

JDR SERVICES:
IWOCS MAINTENANCE

GLOBAL SUPPORT NETWORK FOR RAPID REGIONAL RESPONSE

Oil & Gas
Offshore Services

Oil & Gas
Onshore Services

JDR's global offshore installation and maintenance services supports customers throughout project planning, mobilisation, installation, repair, planned maintenance and spares. JDR's approach delivers a total product life-cycle support.

JDR's Services teams operate globally 24/7/365. The teams support JDR supplied products from strategically located bases in the USA and the UK. Each location offers access to a team of certified and fully equipped Field Service Technicians and Engineers supported by a team of office-based technical support staff and logistics.

JDR are experts in hydraulics, electrical and fibre optic testing; hydraulic power units, pumping skids; umbilical terminations; and reeler maintenance and repair services for JDR and non-JDR products.

**Product
& Installation
Services**

Testing and Calibration

Available globally to provide a system level approach to:

- Troubleshooting and fault diagnosis
- Operator and user manual review, modification, and validation
- Recommended maintenance programs

Asset Management and Product Life Support

Support is not exclusively for emergency repairs and does not cease after delivery. To maintain your system in the highest state of readiness and avoid vessel/rig down-time, JDR provides:

- Periodic inspections, complete with full-condition report
- Completion of any remedial repairs required during inspection
- Asset Management - managing the condition, documentation, certification and calibration of one or a fleet of systems with all of the services above plus full web access to asset records

Spares Management

Strategic spares plans can identify and manage critical spares across a fleet of systems and hold them centrally as required.

Storage & Deployment Management

If management of the IWOCSS suite is not your core business, JDR can provide all of the aforementioned services at a geographically convenient location from which the unit(s) will be mobilized/demobilized and maintained to the highest standards.

JDR is a leading provider of technology connecting the global offshore energy industry. Our products and services enable vital control and power delivery to offshore oil, gas and renewable energy systems. The world's major energy companies and subsea service providers depend on high performance subsea control umbilicals and subsea power cables that operate in the world's harshest offshore environments. JDR invests in state-of-the-art manufacturing facilities, technology and people to deliver these world-class subsea products. We have a proven track record of delivering client expectations and are totally committed to lifecycle customer service. We achieve this through our specialist engineering teams, experienced project management, integrated safety systems and a global service network that ensures 24/7 aftermarket support.
