

Cable Installation Services

JDR Cable Systems is a full life cycle cable supplier with over a decade of experience delivering front end cable design and manufacture as well as installation support and cable repairs. Drawing upon our experience as one of the early market leaders in pioneering the offshore wind industry, JDR is now applying that same experience in the development of the US offshore wind market. Our global team of offshore wind professionals have the experience required to ensure the successful completion of our clients' projects.

JDR's Services Team is pleased to offer the following:

- Cable termination and testing (T&T)
- Cable pull-ins to allow for a streamlined installation schedule
- Offshore rated & field proven RTS unit

JDR's emphasis on workforce training, extensive inventory of company owned T&T equipment, and long track record in the industry means that we can be counted on to mobilize the right people and equipment to ensure a successfully completed project by a company you can trust to stand behind the quality of their products and services both now and in the future.

JDR is a leading provider of technology connecting the global energy industry. Our products and services enable vital control and power delivery for offshore oil & gas and renewable energy systems. The world's energy companies depend on high performing control umbilical and/or power cable systems to operate in the world's harshest environments. JDR invests in state of the art manufacturing facilities, technology and people to deliver these world class energy connection/control products and services. We have a proven track record of delivering client expectations and are totally committed to full lifecycle customer services. We achieve this through our specialist engineering teams, experienced project managers, integrated safety systems and global service network which ensures 24/7 aftermarket support.
